Radio broadcasting  
84.1MHz

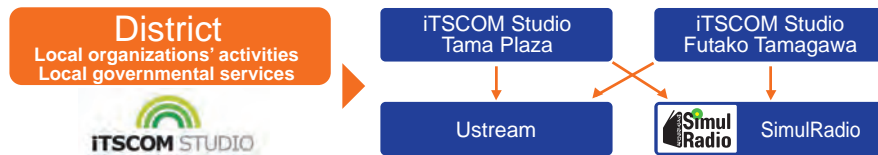

Broadcasting hours:  
7:00- 24:00

FM Salus is a community FM station operating in Aoba Ward, Yokohama City. This station is based on the concept of "Living BGM (Background Music)." It provides local topical programming, information about the Tokyu Line's current operating status, shopping center parking conditions, and crime statistics, together with specially selected music and patter by DJ personalities.

## Local FM Salus Network

The FM Salus Network is designed to bring together the people living within the broadcasting area, including Aoba Ward.

You can listen to "FM Salus" broadcasting over the internet.  
[www.fm-salus.jp](http://www.fm-salus.jp)

FM Salus Network uses multi-media platforms, such as TV, the internet (Ustream, SimulRadio), and "One Source & Multi-use" digital signage (i.e., billboards and other electronic signs) through cross-media development by iTSCOM Studios (Tama Plaza and Futako Tamagawa) to bring you effective, widely distributed, and interesting information.
